

Fuji SSD for smaller facilities

Finally there's an affordable way for small facilities to go completely digital.

Healthcare facilities that conduct under 45,000 radiological studies a year have had few options when it comes to digital x-ray and PACS. Until now. Fuji, one of the most experienced names in digital imaging, has created Fuji SSD (Single Step to Digital). Now you can choose from three groundbreaking packages that will transform your department to a completely digital environment at an affordable price.

Fuji CR. The best first step to digital.

The first step to a totally digital environment is digital x-ray. And there is no better digital x-ray than Fuji CR. Our commitment to advancing the science of digital x-ray has made us the leader for over 20 years. In fact, Fuji's 22,000 CR systems produce nearly 2 million digital x-rays around the world every day.

Our first priority has always been image quality, which is why FCR is the standard other digital x-ray is measured by. FCR also benefits from decades of clinical research and development. Customers the world over have suggested ways for us to improve radiographic productivity. Integrating these ideas has made our systems faster, easier to use and more efficient. And when you need support, you can count on Fuji. Our expert professional services team has the skills and experience you need. Fuji offers a full line of CR equipment including two systems that bring superior CR to low-exam volume facilities: the XG5000 and the compact SmartCR®.

Synapse®. The new standard in PACS.

Fuji Synapse is the first web-based PACS developed and supported by a large imaging company. It uses a familiar Windows® interface so it's easy to learn and easy to use for technologists, radiologists and referring physicians. And it was designed to keep

information accessible no matter where you are in the network – on or off site, even on a standard PC.

SYNAPSE® it's easily scalable, so you can quickly

and inexpensively add workstations to expand your system. Plus, you can count on Fuji to be there to provide you with the integration and training services you'll need.

Fuji Financial Services provides financing solutions that are just as flexible as Synapse itself. And due to Fuji's notable financial strength and depth, we're in the unique position of being able to offer the lowest financing rates in the industry. We are uniquely positioned to help you through your very important digital transformation.

DRYPIX™. A higher level of imaging.

Fuji DRYPIX imagers provide more than great images. They improve your workflow efficiency and productivity. They reduce your operating costs by providing the lowest cost of ownership. And they give you

DRYPIX™ unrivalled diagnostic confidence. All in all, Fuji DRYPIX imagers

are the premier printers for every modality, every environment. Even smaller facilities can get the advantages of DRYPIX. Fuji's DRYPIX 5000 and more compact DRYPIX 3000 deliver big.

Fuji SSD Package 1 – Synapse

The most affordable PACS solution ever offered by Fuji.

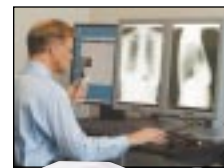

Fuji has taken Synapse, the most revolutionary PAC system ever introduced, and made it accessible to lower-exam volume facilities. This is a complete Synapse system – all the hardware, software, service and support is included. But it's specially designed for your current volume and ready to expand when you grow.

Fuji SSD Package 2 – FCR XG5000, DRYPIX 5000 and Synapse

The highest quality total digital environment you can get.

The industry-leading digital x-ray system, the full-function Synapse system complete with all the necessary hardware, software, service and support; plus laser imaging. Fuji's XG5000 delivers 165 IPs an hour. In fact, it's the fastest system you can get. And as for image quality, it's consistently high with the perfect first-up image for any application to optimize your clinical workflow. This package also includes our DRYPIX 5000 laser printer. It's got the performance, quality and networkability of our best printers with the siting flexibility of chemical-free processing, 110-volt power and outstanding throughput.

Fuji SSD Package 3 – SmartCR, DRYPIX 3000 and Synapse

A total digital environment that's smaller and less expensive.

A full-function Synapse system complete with all the necessary hardware, software, service and support. Plus Fuji's SmartCR. The world's best selling digital x-ray system gives you all the diagnostic capabilities of Fuji CR in a footprint of only 3 square feet. And it's fast – up to 90 IPs per hour. Rounding out the package is our extraordinary dry thermal imager. The tabletop DRYPIX 3000 is quiet and compact, yet it prints 50 14" x 17" films per hour.

Fuji SSD. Now there's a digital x-ray and PACS solution that's just your size. And within your reach. For more information, contact your local Fuji Sales Representative or call 1-800-431-2861 today.
