

PACS comm™

CD/DVD Image *Recording* Systems

Automated Disc Recording, Storage and Distribution System with support for mixed media configurations. The P150 includes the feature rich, DICOM compliant, Web-based PACScomm CD/DVD recording applications. The configurability and usability of the PACScomm application makes it the easiest and most deployable system in the market today.

PACScomm P150

System Features

- Ability to record both **CD and DVD** media
- **Web-based** architecture with full network capability
- Over 100GB of local image storage
- CD import of prior DICOM formatted studies
- Security and logs to support **HIPAA compliance**
- Ability to support multiple viewers and print surface formats
- Primera Bravo II robotics – single burner, inkjet printer, 2x25 blank media capacity.

About ODS Medical

ODS Medical provides **innovative cost effective** solutions allowing hospitals, imaging centers, and referring physician practices to move economically into a digital environment, as well as enhancing existing digital environments. ODS systems record, store, manage and distribute digital images and studies. PACScomm, is a **high performance** CD/DVD Image Recording System, that records images from modalities or PACs onto CDs and DVDs. Its integrated design and affordability is a very cost effective alternative to film. ODS serves the North American health care market from its corporate office in Columbia, Maryland.
